BRAND GUIDE · VERSION 1 · OCTOBER 2026

Sodo Gebeya

ሶዶ ገበያ

How to use the Sodo Gebeya logo, colours and lettering, so the brand looks the same everywhere: the app, Telegram, posters and shop stickers.

Prepared by Abel · Wolaita Sodo

01 · THE LOGO

One symbol, four versions

The symbol is an **S inside a map pin**: Sodo, and a place near you. The amber dot is the spark of a new deal. Use the full logo where there's room, and the symbol alone where space is small.

Main logo. Website header, documents, posters. Use it on white or very light backgrounds.

On green. Covers, videos, dark screens. The white symbol keeps the S in green.

Stacked. Square spaces: shop stickers, banners, the first screen of the app.

Stacked on green. The same, for dark backgrounds.

One-colour versions

For stamps, receipts, t-shirts, engraving and printing in one colour. The S is cut out, so the background shows through.

02 · COLOURS AND LETTERING

Green for trust, amber for the market

Use green as the main colour and amber for highlights: prices, buttons, "new". Keep the rest white or mist so the colours stand out.

Sodo green

#0E5A43 · RGB 14 90 67

Light green

#13785A · RGB 19 120 90

Market amber

#E39B2D · RGB 227 155 45

Deep amber

#B8741A · RGB 184 116 26

Ink

#13201A · RGB 19 32 26

Mist

#F4F8F6 · RGB 244 248 246

Lettering

Headings and the logo	**Inter Display ExtraBold**
Text, buttons, the app	Inter Regular / SemiBold
Amharic	**ሶዶ ገበያ · Noto Sans Ethiopic**

All three are free Google Fonts. In the logo files the lettering is already turned into shapes, so the logo looks right even where these fonts aren't installed.

App icon and profile picture

Use the **green icon** for the app, the website favicon and Telegram. Use the **round profile picture** for Facebook, Instagram, TikTok and YouTube. The symbol sits in the middle, so it stays whole when cropped to a circle.

03 · USING IT WELL

Space, size and a few don'ts

Clear space

Keep empty space around the logo at least as wide as the **height of the pin's dot** times two. No text, photos or edges inside it.

Smallest size

Full logo: at least **32 mm** wide in print, **120 px** on screen.

Below that, use the **symbol alone**: at least 8 mm or 24 px.

Don't

Don't stretch or squash it

Don't change the colours

Don't rotate it

Don't add shadows or effects

Don't put the colour logo on amber or busy photos

Don't put the colour logo on green: use the green version

Files in the kit

logo-horizontal / logo-stacked	color, dark (on green), white, black · SVG and PNG
symbol	color, dark, white, black · SVG and PNG
app-icon, favicon	1024, 512, 192, 180 px · favicon.ico (16 and 32 px)
profile-picture, covers	1080 × 1080 · Facebook 1640 × 624 · YouTube 2560 × 1440 · Telegram/X 1500 × 500
